

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	19 July 2026
Team ID	
Project Name	Nutrition Assistant
Team Members	Kulasri Durga Deepika Bora Polimera Girija(Team laed)
Maximum Marks	4 Marks

Selected Problem Statement

Busy students and professionals struggle to maintain consistent nutrition and hydration habits because their health information is scattered across different tools or is not tracked at all. They need one simple application to log meals, water, BMI and progress and receive relevant recommendations.

Step 1: Team Gathering and Collaboration

Team Member	Role	Contribution
Polimera Girija	Team Lead & Backend Developer	Defined API architecture, database models, authentication, analytics and recommendation logic.
Kulasri Durga Deepika Bora	Frontend Developer	Designed and implemented the responsive React interface, dashboards, forms, trackers and charts.

Step 2: Brainstorm, Idea Listing and Grouping

Idea Group	Idea	Initial Priority
Core Health Tracking	Meal logging with calories and macronutrients	High
Core Health Tracking	Water intake tracking with daily goal progress	High
Core Health Tracking	BMI calculation and BMI history	High
Account & Profile	Secure registration, login and JWT authentication	High
Account & Profile	Profile management with profession, goal and activity level	High
Insights	Dashboard summary of meals, water, calories and BMI	High
Insights	Weekly analytics using charts and daily breakdown	High

Personalization	Rule-based recommendations based on profile and daily records	High
Engagement	Notifications and reminders for meals and hydration	Medium – Future
Convenience	Profile image upload	Low – Future
Administration	Admin dashboard and user management	Low – Future
Reporting	Downloadable health progress report	Medium – Future

Step 3: Idea Prioritization

Idea	Impact (1–5)	Effort (1–5)	Priority	Decision
User registration and login	5	3	High	MVP
Meal Tracker CRUD	5	3	High	MVP
Water Tracker	5	2	High	MVP
BMI Calculator with history	4	2	High	MVP
Dashboard summary	5	3	High	MVP
Weekly analytics	4	3	High	MVP
Personalized recommendations	5	3	High	MVP
Email/notification reminders	4	4	Medium	Future
Admin panel	3	5	Low	Future
PDF progress report	3	4	Medium	Future

Final Prioritized Solution

- Develop a responsive full-stack web application using React, Express and MongoDB.
- Complete the core MVP with authentication, profile, meal tracking, water tracking, BMI, dashboard, analytics and rule-based recommendations.
- Keep reminders, admin features, image upload and downloadable reports as future enhancements.
