Customer Problem Statements

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A busy student or working professional	Maintain balanced meals and adequate hydration every day	I frequently forget to log meals, water and health measurements	My schedule is busy and existing information is spread across multiple apps or notes	Uncertain, inconsistent and worried about my long-term health habits
PS-2	A user who wants to improve or maintain health	Understand whether my daily habits support my personal goal	Most applications provide generic advice without considering my profession, activity level, goal or current records	Personalized tracking and recommendations are not available in one simple dashboard	Confused and less motivated to continue healthy habits

How Might We Statement

How might we...

How might we help busy students and professionals track meals, hydration, BMI and progress in one secure, easy-to-use application while providing relevant recommendations based on their profile and daily records?

Root Problem

- Daily health tracking is fragmented and often manual.
- Users lack immediate visibility into calories, nutrients, water and BMI trends.
- Generic health advice does not account for personal goals, profession or activity level.
- Busy schedules reduce consistency and motivation.
