

Customer Journey Map – NutriPulse

Date	19 July 2026
Team ID	
Project Name	Nutrition Assistant
Team Members	Kulasri Durga Deepika Bora Polimera Girija(Team lead)
Maximum Marks	Reference Deliverable

Scenario

A busy user discovers NutriPulse, creates a secure account, records daily health activities and uses dashboard insights and recommendations to build healthier habits.

Journey Stage	User Actions	Touchpoints	Emotion	Pain Point	Opportunity
Discover	Learns about NutriPulse through college, peers or project demo.	Landing page	Curious	Unsure whether the app will be useful.	Clear value proposition and feature preview.
Register & Login	Creates account with name, email, password and basic health details.	Register/Login pages	Hopeful	Long forms or duplicate email may cause confusion.	Simple validation and friendly error messages.
Complete Profile	Sets profession, age, gender, height, weight, goal and activity level.	Profile page	Confident	May not know exact health measurements.	Allow later profile updates.
Track Daily Health	Logs meals, water and BMI measurements.	Meal, Water and BMI pages	Focused	Manual entry may be forgotten.	Quick-add buttons and short forms.
Review Dashboard	Checks calories, nutrients, water progress, BMI and recent meals.	Dashboard and charts	Informed	No data if the user has not logged records.	Helpful empty states and progress indicators.
Use Recommendations	Reads suggestions based on profile, goal and current records.	Recommendation cards	Motivated	Could misinterpret general wellness advice.	Show disclaimer and priority labels.
Continue & Improve	Returns daily, updates records and reviews weekly analytics.	Analytics and all trackers	In control	Consistency may decrease over time.	Future reminders, streaks and reports.

Journey Success Measures

- The user can register and reach the dashboard without assistance.
- The user can add, edit and delete meals and view updated totals.
- The user can track water, calculate BMI and review weekly charts.

- Recommendations are understandable, relevant and clearly identified as general guidance.
